

National Traffic Control Centre

INDUSTRY: Highways

LOCATION: Quinton, BIRMINGHAM

DESCRIPTION: Washroom Refurbishment

PROJECT TIME: 4 Weeks

Project description:

- Cubicles & vanity units
- Flooring
- Wall tiles
- Warm air hand dryers
- Ceiling
- Lighting
- Accessories

This National Highways Operator approached us with a dilemma. Their toilet accommodation was cramped, looking tired and didn't portray the smart contemporary image of the building it inhabited.

With careful re-planning, more circulation space was created and the rooms brightened with upgraded lighting and the use of lighter materials.

The result? A luxury washroom refurbishment with stunning visual effect and a very satisfied customer.

Cherry and maple were used as contrasting wood finishes to comply with DDA requirements whilst giving a high class appearance.

Large format porcelain floor tiles give a prestigious but easy clean finish.

Lighting is a key element in washroom fit outs. With the use of direct and indirect light fittings, coupled with energy efficient lamps, the desired effect was achieved.

Movement sensors have been installed to give further energy savings together with improved hygiene and operational efficiency.

One of the problems regularly encountered in washrooms is a lack of good lighting. This was rectified with the use of direct and in-direct energy efficient lighting, controlled by movement sensors for further energy savings.

Matching vanity basins were installed with a large mirror and striking mosaic tiles. High quality stainless steel soap, paper towel and toilet paper dispensers were specified.

Dyson Airblade hand dryers are at the cutting edge of technology. The customer wants to cut down the use of paper towels and this is part of the plan. These hand dryers are guaranteed to dry your hands in 10 seconds and are a far cry from the old noisy electric hand dryers.

Maximum use has been made of the limited space available to create a bright and airy space. Detailed consideration has been given to concealing all services to create an easy clean maintenance free finish.
