

Case study:

Maxwood Washrooms Stafford HQ

STUNNING DESIGN AND SEAMLESS DELIVERY

Accolade

Maxwood Washrooms Stafford HQ

Maxwood washrooms are an innovative leader in commercial washrooms, creating outstanding washroom experiences from concept to completion, designed with the people in mind.

The brief: a stunning design to enable business growth

Operating in a design led market, Maxwood were looking to achieve a stunning wow factor for their new Stafford HQ, that would enable them to attract and retain the best talent to enable the business to grow.

Accolade worked with Maxwood to achieve just that, and the result speaks for itself – a beautifully designed yet functional space which truly reflects the design culture that is part of Maxwood's DNA.

"We found the Accolade team very approachable and friendly and we worked with them on every step of the journey through the design process, the build up of the budget and then the delivery phase. I'd strongly recommend them to anyone else that needs an office fitout that is going to benefit their staff and their future growth."

Rolf McMullan
Managing Director Maxwood Washrooms

Accolade Workspace, known for expertise in creating productive workspaces, worked in partnership with Maxwood on this ambitious project. Highlights from the design process included:

- **Creating a 3D model and walkthrough:** Accolade took time to understand and establish a really clear brief, and developed a full design and 3D model and walkthrough, which allowed the Maxwood team to really visualise the new space, which made the whole design process and decisions much quicker
- **Stunning breakout space:** We created a stunning breakout space with striking design features, including Rombini tiles
- **Open plan office space:** Creating an open plan office with areas for collaboration, booths for calls and meeting spaces, with design elements including planting and a fluted panelled wall
- **A truly flexible conference space:** Creating an incredibly versatile conference room that would work as a meeting room, training area and all staff meeting space
- **Toned colour palette:** We created a beautifully toned colour palette, reflecting the corporate colours of Maxwood, creating a space immersed in the brand

All staff meeting space

A truly flexible conference space

We created an incredibly versatile conference room that would work as a meeting room, training area and all staff meeting space, allowing board meetings, training sessions and all staff 'town hall' meetings to happen here.

The execution: Seamless delivery

With a tight timescale due to a move deadline, the Accolade team worked on a clear project programme that allowed the Maxwood team to move into their new HQ on time and on budget.

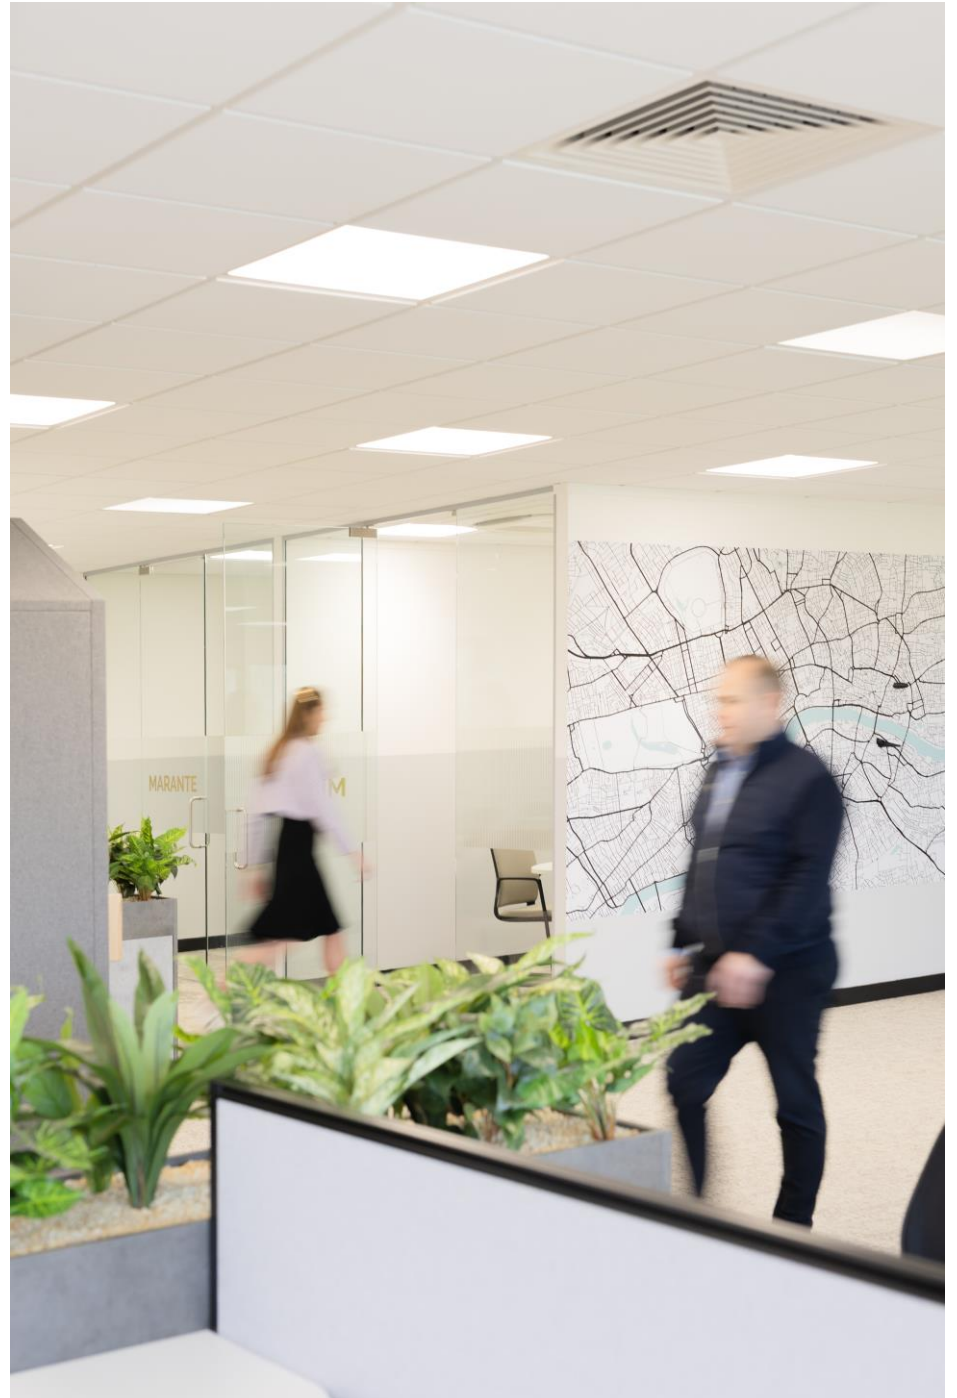

The Outcome: "An environment like we've never had before"

The partnership between Accolade and Maxwood has resulted in an exceptional space for Maxwood to attract and retain talent, providing a fantastic base from which to grow.

"We found the Accolade team very approachable and friendly and we worked with them on every step of the journey through the design process, the build up of the budget and then the delivery phase. Accolade gave us a very clear program of works they were working to. We had a very tight timescale, and Accolade delivered on budget and on time. I'd strongly recommend them to anyone else that needs an office fitout that is going to benefit their staff and their future growth "

Rolf McMullan, Managing Director Maxwood Washrooms
